

CALL FOR PAPERS

HM 2019 - 11th International Workshop on Hybrid Metaheuristics
January 16-18, 2019 - Concepción, Chile

Website: <http://hm2019.ing.udec.cl>

Submission: <https://easychair.org/conferences/?conf=hm2019>

Proceedings: Springer LNCS

Metaheuristics are considered state-of-the-art methods for many hard optimization problems. At some point, however, it has become evident that the concentration on a sole metaheuristic is rather restrictive. A skilled combination of concepts from different optimization techniques can provide a more efficient behavior and a higher flexibility when dealing with real-world and large-scale problems. Hybrid Metaheuristics are techniques for optimization that combine different metaheuristics or integrate AI/OR techniques into metaheuristics. Since 2004, the HM Workshops are considered to be an international forum for researchers in the area hybrid metaheuristics.

KEYNOTE SPEAKERS

- Haroldo Gambini Santos, Federal University of Ouro Preto, Brazil
- Manuel López-Ibáñez, The University of Manchester, UK
- Günther R. Raidl, Technische Universität Wien, Austria
- Christian Blum, Artificial Intelligence Research Institute (IIA-CSIC), Spain

IMPORTANT DATES

- **Submission deadline: July 27, 2018**
- Notification: October 1, 2018
- Camera-ready paper submission: October 19, 2018
- Conference: January 16-18, 2019

ORGANIZATION

- Congress Chair: Pedro Pinacho Davidson
- Program Chairs: Christian Blum, Haroldo Gambini Santos
- Publication and Publicity Chair: Maria J. Blesa
- Local Organization Chair: Julio Godoy del Campo

INQUIRIES

- **Email:** ppinacho@udec.cl

**Looking forward to welcoming you to Concepción in January 2019.
The HM 2019 organizing team!**
