

## CALL FOR POSTERS

**HM 2019** - 11th International Workshop on Hybrid Metaheuristics

January 16-18, 2019 - Concepción, Chile

**Website:** <http://hm2019.ing.udec.cl>

**Evaluation Committee:**

**GIOCo** (Grupo de Investigación en Optimización Combinatorial, UdeC)

---

Metaheuristics are considered state-of-the-art methods for many hard optimization problems. At some point, however, it has become evident that the concentration on a sole metaheuristic is rather restrictive. A skilled combination of concepts from different optimization techniques can provide a more efficient behavior and a higher flexibility when dealing with real-world and large-scale problems. Hybrid Metaheuristics are techniques for optimization that combine different metaheuristics or integrate AI/OR techniques into metaheuristics. Since 2004, the HM Workshops are considered to be an international forum for researchers in the area of hybrid metaheuristics.

Presenting a poster is a great way to get feedback on work in progress. Poster presentations will be an integral part of the conference, with a session for interactive discussion between presenters and attendees. Poster submission must be in English and with authors names. The submission must be in the form of a two-page abstract.
